2	528-529	Age value used to determine age groups (_IMPAGE)	18-99= Reported or imputed ages* *This value is the reported age or an imputed age, if the respondent refused to give an age. The imputed age value is only used to estimate the age group used to compute the final weight. It will not be recorded as the respondent's age. The value of the imputed age will be an average age computed from the sample if the respondent refused to give an age.
