

CLEAN HANDS COUNT

FOR HEALTHCARE PROVIDERS

KNOW THE **TRUTH** TO PROTECT YOURSELF AND PROTECT YOUR PATIENTS

TRUTH:

Alcohol-based hand sanitizer is more effective and less drying than using soap and water.

THE NITTY GRITTY:

Compared to soap and water, alcohol-based hand sanitizers are better at reducing bacterial counts on hands and are effective against multidrug-resistant organisms (e.g., MRSA). Additionally, alcohol-based hand sanitizers cause less skin irritation than frequent use of soap and water.

TRUTH:

Using alcohol-based hand sanitizer does NOT cause antibiotic resistance.

THE NITTY GRITTY:

Alcohol-based hand sanitizers kill germs quickly and in a different way than antibiotics. There is no chance for the germs to adapt or develop resistance.

TRUTH:

Alcohol-based hand sanitizer does not kill *C. difficile*, but it is still the overall recommended method for hand hygiene practice.

THE NITTY GRITTY:

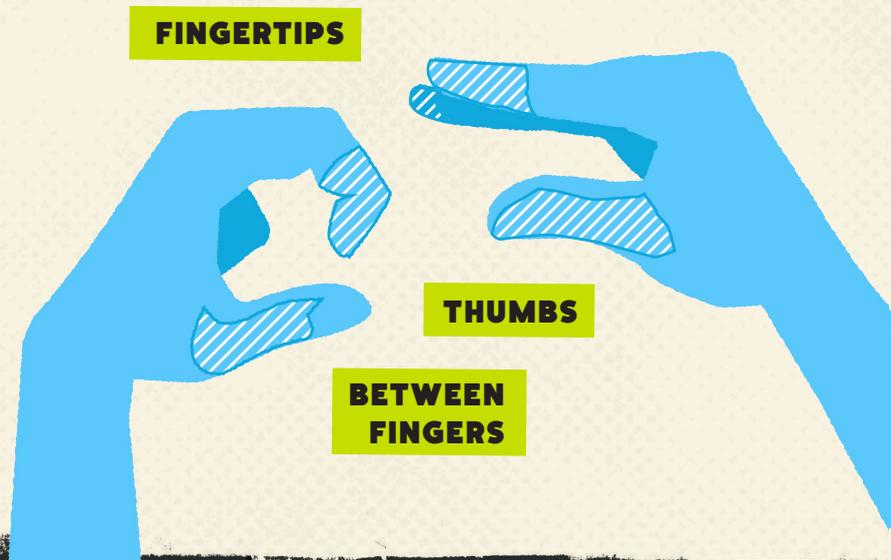

Always use gloves when caring for patients with *C. difficile*. In addition, when there is an outbreak of *C. difficile* in your facility, wash your hands with soap and water after removing your gloves.

TRUTH:

Some healthcare providers miss certain areas when cleaning their hands.

THE NITTY GRITTY:

Using alcohol-based hand sanitizer becomes a habit and sometimes healthcare providers miss certain areas:

Clean Hands Count 100% of the Time

PROTECT YOURSELF AND PROTECT YOUR PATIENTS FROM POTENTIALLY DEADLY GERMS

TRUTH:

The amount of product you use matters.

THE NITTY GRITTY :

Use enough alcohol-based hand sanitizer to cover all surfaces of your hands. Rub your hands together until they are dry. Your hands should stay wet for around 20 seconds if you used the right amount.

TRUTH:

Glove use is not a substitute for cleaning your hands. Dirty gloves can soil your hands.

THE NITTY GRITTY :

Clean your hands after removing gloves to protect yourself and your patients from infection.

TRUTH:

On average, healthcare providers perform hand hygiene less than half of the times they should.

THE NITTY GRITTY :

When healthcare providers do not perform hand hygiene 100% of the times they should, they put themselves and their patients at risk for serious infections.
