

Now Available: A Dengue Vaccine

Protect your child from getting sick with dengue.

1 TALK

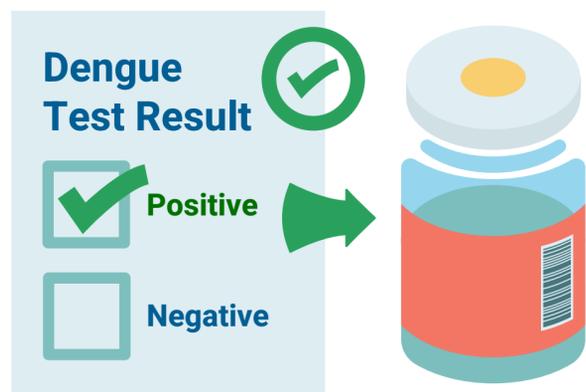

Talk to your child's healthcare provider.

Your child's healthcare provider can provide information about the Dengvaxia vaccine and answer your questions.

2 TEST

Get your child tested.

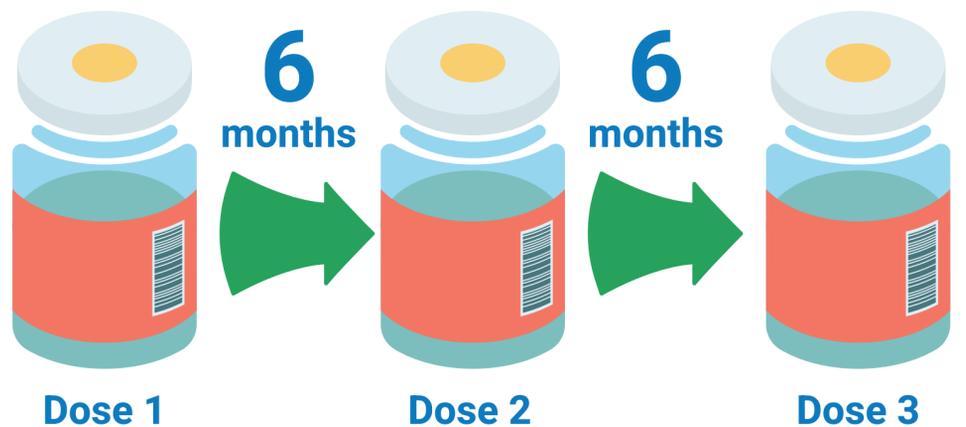

Only children who have laboratory-confirmation of previous dengue infection are eligible for the vaccine. Your child's healthcare provider will review your child's medical records or order blood testing.

3 VACCINATE

Get your child vaccinated.

Schedule the first dose of your child's vaccine as soon as their healthcare provider recommends it. Schedule second dose 6 months after first and third dose 6 months after second.
