

Donald C. Mackel Memorial Award

Don Mackel was the first microbiologist in EIS (1953). It was said, “The early CDC reputation for always finding the cause of the epidemic was in no small part due to Don’s sleuthing in from the Epi Lab.” The Donald C. Mackel Memorial Award, created by the EIS Alumni Association, in partnership with the CDC Foundation, recognizes a current EIS officer for the oral presentation that best exemplifies the effective application of a combined epidemiology and laboratory approach to an investigation or study.
