

U.S. CDC's Middle East/ North Africa Regional Office

Note: This map displays countries covered in the Middle East/North Africa geographic region. CDC engagement is only in countries with established U.S. diplomatic relations.

Established in 2020, U.S. CDC's Middle East/North Africa (MENA) Regional Office, located in Muscat, Oman, strengthens and expands CDC's historically limited footprint in the region. Strategic global partnerships strengthen health systems in the region, reducing strain on U.S. resources and enhancing readiness against health threats. U.S. CDC advances regional health security to make America safer, stronger, and more prosperous.

Key Areas of Focus

Reflecting U.S. CDC's Global Health Strategy, CDC MENA is focused on responding to health threats in the region by building core public health capacities in:

Workforce Development

Emergency Preparedness and Response

Public Health Surveillance and Data Systems

Migration Health

Laboratory Systems

One Health, including Antimicrobial Resistance

Immunization Systems, Vaccine Planning, and priority vaccine-preventable disease elimination

Emerging and Re-Emerging Disease Threats

Regional Goals

U.S. CDC and partners are collaborating to:

- **Strengthen** partnerships with defined roles and expectations for engagement
- **Increase** opportunities for public health collaboration
- **Develop** a capable, flexible, and responsive regional public health workforce
- **Strengthen** laboratory capacity and support
- **Enhance** capacity of governments to effectively manage and respond to public health emergencies
- **Strengthen** regional capacity to address priority public health concerns
- **Support** responsive and reliable surveillance systems
- **Develop** evidence-based public health policies, guidance, and recommendations
- **Decrease** prevalence of vaccine preventable diseases
- **Eliminate** diseases of public health importance
- **Leverage** health diplomacy initiative to promote peace in the region

U.S. CDC's Regional Offices

Regional offices support U.S. CDC to prevent, detect and respond rapidly, efficiently, and effectively to health threats wherever they occur. Regional offices are part of a U.S. CDC network of regional and country offices in over 60 countries. Since 2020, U.S. CDC has established six regional offices, covering Eastern Europe/Central Asia, the Middle East/North Africa, South America, Southeast Asia, Central America and the Caribbean, and East Asia/Pacific. Incorporating a regional approach to U.S. CDC's work in countries around the world further strengthens the agency's ability to strategically advance global health security; implement a sustainable, long-term overseas structure; expand the reach of technical assistance and programs; and respond rapidly to disease outbreaks

U.S. CDC's Global Health Mission

For over 75 years, U.S. CDC has served as the lead public health agency for the United States. U.S. CDC's mission is a safer, stronger and more prosperous nation through prevention, detection, and response to disease threats, anytime and anywhere. U.S. CDC supports partner governments to build health programs, address health threats, enhance sustainable and country owned public health systems, and improve health outcomes. Through partnerships, U.S. CDC supports people around the world to live healthier, safer, longer lives.

U.S. CDC's Global Health Strategic Framework

Six core pillars and objectives, outlined in its Global Health Strategic Framework, encompass U.S. CDC's global health activities:

Data & Surveillance

Ensuring interoperable data & surveillance systems that detect, identify & monitor disease threats & produce high quality, timely data to inform public health action

Laboratory

Building public health laboratory systems that rapidly & accurately detect, track & inform public health action

Workforce & Institutions

Training & developing a multisectoral health workforce & coordinated essential public health services to prevent, detect, & respond to disease threats & integrate national public health functions

Prevention & Response

Developing systems, tools, & processes that enhance response to public health emergencies including implementation of prevention & mitigation strategies and countermeasures

Public Health Innovation & Research

Supporting research, implementation science & public health evaluations to inform best practices for preventing diseases & countering health threats

Health Policy, Communication & Diplomacy

Promoting resources & relationships that can develop & support the use of evidence-based public health policy, communicate risk, & disseminate prevention messages
