

# HEPATITIS A AND B VACCINATION.

A photograph of two men sitting outdoors, smiling and talking. The man on the left is wearing a white polo shirt with purple stripes, and the man on the right is wearing a purple button-down shirt. They are sitting on a wooden bench or ledge, with green foliage in the background.

There's no question – it's easy prevention. Gay and bisexual men are at risk for hepatitis A and B.

**Take charge. Protect yourself. Get vaccinated.**
