

Reduce reported rate of hepatitis C-related deaths among non-Hispanic Black persons by 30% or more

National Progress Report 2025 Goal

Status: Met or exceeded current annual target

Age-adjusted rate* of hepatitis C-related deaths† among non-Hispanic Black persons and annual targets for the United States by year

* Rates are per 100,000 and age-adjusted to the 2000 US Standard Population.

† Cause of death is defined as the underlying cause of death or one of the multiple causes of death and is based on the International Classification of Disease, 10th Revision (ICD-10) codes B17.1 or B18.2 (2).
