Code Set Release Notes**

VIS Document Code Set Updates May 29, 2025

Release Notes: This release covers code updates for Vaccine Information Statement (VIS) codes and maps effective 05/29/2025.

Release Summary

1. Two New VIS Editions Added
2. Two Prior VIS Editions Retired

VIS Code Update Details

VIS codes are created to enable provider systems to implement VIS 2D barcode scanning and to help automate capture of the specific VIS document edition given to the recipient or caregiver. VIS codes may be published in advance of the actual VIS document publication, but they are only in effect and useable starting on the edition date of the VIS. The URLs included in the vaccine code set will not point to the new edition until the VIS document edition date.

This release includes the following VIS related code updates.

1. Two New VIS Editions Added
