

NEW INTERACTIVE TRAINING: “EVS AND THE BATTLE AGAINST INFECTION”

This interactive training illustrates the important role environmental services (EVS) personnel have in the prevention of healthcare-associated infections (HAIs). Help stop HAIs from spreading:

Protect yourself, patients, and the facility with infection prevention and control practices.

Work with colleagues to identify infection risks.

Prioritize areas that pose immediate safety risks.

Follow guidelines for cleaning and disinfecting.

An HAI is an infection that can result from receiving health care.

On any given day, about 1 in 31 hospital patients has at least one healthcare-associated infection.

Take the interactive training and access other helpful resources at www.cdc.gov/infectioncontrol.
