Zika virus <sup>††,§§§§</sup>	—	—	—	—	—	—	—	—	
Zika virus congenital infection	NA	NA	NA	NN	NN	NN	NN	NN	
Zika virus disease, non-congenital infection	—	381	—	45	NN	NN	NN	NN	

—: No reported cases. N: Not reportable. NN: Not Nationally Notifiable. NP: Nationally notifiable but not published. Cum: Cumulative year-to-date counts.

\* Case counts for reporting years 2015 and 2016 are provisional and subject to change. Data for years 2011 through 2014 are finalized. For further information on interpretation of these data, see <http://www.cdc.gov/nndss/document/ProvisionalNationalNotifiableDiseasesSurveillanceData20100927.pdf>.

<sup>†</sup> This table does not include cases from the U.S. territories. Three low incidence conditions, rubella, rubella congenital, and tetanus, are in Table II to facilitate case count verification with reporting jurisdictions.

<sup>§</sup> Calculated by summing the incidence counts for the current week, the 2 weeks preceding the current week, and the 2 weeks following the current week, for a total of 5 preceding years. Additional information is available at <http://www.cdc.gov/nndss/document/5yearweeklyaverage.pdf>.

<sup>¶</sup> Includes both neuroinvasive and nonneuroinvasive. Updated weekly reports from the Division of Vector-Borne Diseases, National Center for Emerging and Zoonotic Infectious Diseases (ArboNET Surveillance). Data for West Nile virus are available in Table II.

<sup>\*\*</sup> Not reportable in all reporting jurisdictions. Data from states where the condition is not reportable are excluded from this table, except for the arboviral diseases and influenza-associated pediatric mortality. Reporting exceptions are available at <http://www.cdc.gov/nndss/downloads.html>.

<sup>††</sup> Office of Management and Budget approval of the NNDSS Revision #0920-0728 on January 21, 2016, authorized CDC to receive data for these conditions. CDC is in the process of soliciting data for these conditions (except Zika virus, congenital infection). Data are not available (NA) because CDC and the U.S. states are still modifying the technical infrastructure needed to collect and transmit data for Zika virus congenital infections.

<sup>§§</sup> Jamestown Canyon virus and LaCrosse virus have replaced California serogroup diseases.

<sup>¶¶</sup> Data for *Haemophilus influenzae* (all ages, all serotypes) are available in Table II.

<sup>\*\*\*</sup> Updated weekly from the Influenza Division, National Center for Immunization and Respiratory Diseases. Since October 4, 2015, 60 influenza-associated pediatric deaths occurring during the 2015–16 influenza season have been reported.

<sup>†††</sup> No measles cases were reported for the current week.

<sup>§§§</sup> Data for meningococcal disease (all serogroups) are available in Table II.

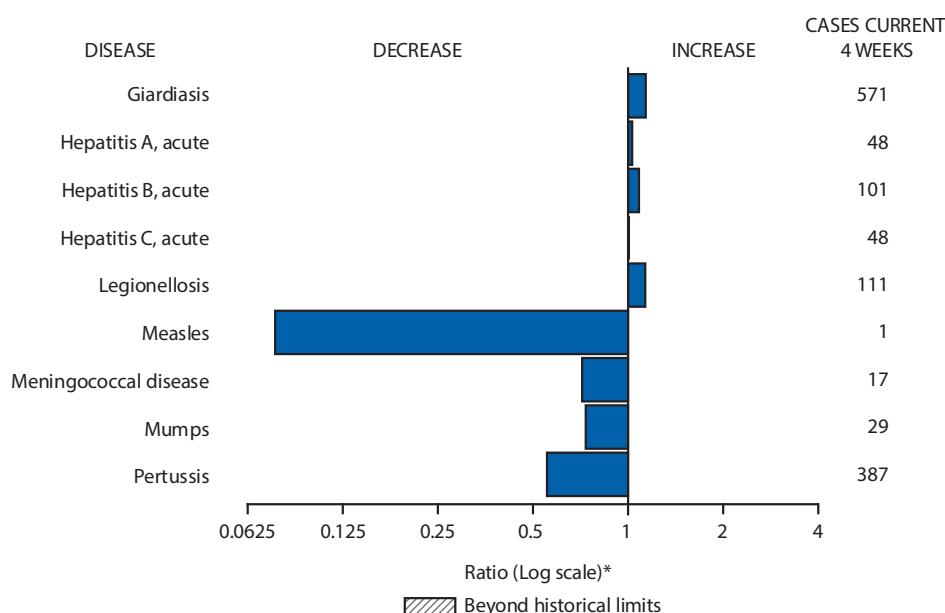

<sup>¶¶¶</sup> All cases of novel influenza A virus infection reported to CDC since 2011 have been variant viruses. Influenza viruses that circulate in swine are called swine influenza viruses when isolated from swine, but are called variant viruses when isolated from humans. Variant influenza viruses are different from the influenza A (H1N1)pdm09 virus. Total case counts are provided by the Influenza Division, National Center for Immunization and Respiratory Diseases (NCIRD).

<sup>\*\*\*\*</sup> Updated weekly from reports to the Division of STD Prevention, National Center for HIV/AIDS, Viral Hepatitis, STD, and TB Prevention.

<sup>††††</sup> Prior to 2015, CDC's National Notifiable Diseases Surveillance System (NNDSS) did not receive electronic data about incident cases of specific viral hemorrhagic fevers; instead data were collected in aggregate as "viral hemorrhagic fevers". Beginning in 2015, NNDSS has been updated to receive data for each of the viral hemorrhagic fevers listed below. In addition to the four cases of Ebola diagnosed in the United States to date in 2014, six residents of the United States have been medically evacuated to the United States for care after developing Ebola in West Africa. Ten of the 11 Viral Hemorrhagic Fever cases reported for 2014 are confirmed as Ebola and one as Lassa fever.

<sup>§§§§</sup> All cases reported have occurred in travelers returning from affected areas, with their sexual contacts, or infants infected in utero.

**FIGURE I. Selected notifiable disease reports, United States, comparison of provisional 4-week totals April 23, 2016, with historical data**

\* Ratio of current 4-week total to mean of 15 4-week totals (from previous, comparable, and subsequent 4-week periods for the past 5 years). The point where the hatched area begins is based on the mean and two standard deviations of these 4-week totals.

C.N.M.I.: Commonwealth of Northern Mariana Islands.

U: Unavailable. —: No reported cases. N: Not reportable. NN: Not Nationally Notifiable. NP: Nationally notifiable but not published. Cum: Cumulative year-to-date counts. Med: Median. Max: Maximum.

\* Three low incidence conditions, rubella, rubella congenital, and tetanus, are in Table II to facilitate case count verification with reporting jurisdictions.

<sup>†</sup> Case counts for reporting year 2015 and 2016 are provisional and subject to change. For further information on interpretation of these data, see

<http://www.cdc.gov/mmwr/preview/ProvisionalNationalNotifiableDiseasesSurveillanceData20100927.pdf>. Data for TB are displayed in Table IV, which appears quarterly.

<sup>§</sup> Data for *H. influenzae* (age  $< 5$  for serotype b, non typable serotype, other serotype, and unknown serotype) are available in Table I.

Morbidity and Mortality Weekly Report

TABLE II. (Continued) Provisional cases of selected notifiable diseases ( $\geq 1,000$  cases reported during the preceding year), and selected\* low frequency diseases, United States and U.S. territories, weeks ending April 23, 2016, and April 25, 2015 (16th week)<sup>†</sup> (Export data)

C.N.M.I.: Commonwealth of Northern Mariana Islands.

U: Unavailable. —: No reported cases. N: Not reportable. NP: Nationally notifiable but not published. Cum: Cumulative year-to-date counts. Med: Median. Max: Maximum.

\* Three low incidence conditions, rubella, rubella congenital, and tetanus, are in Table II to facilitate case count verification with reporting jurisdictions.

† Case counts for reporting year 2015 and 2016 are provisional and subject to change. For further information on interpretation of these data, see <http://www.cdc.gov/nndss/document/ProvisionalNationalNotifiableDiseasesSurveillanceData20100927.pdf>. Data for TB are displayed in Table IV, which appears quarterly.§ Includes drug resistant and susceptible cases of Invasive Pneumococcal Disease. This condition was previously named *Streptococcus pneumoniae* invasive disease and cases were reported to CDC using different event codes to specify whether the cases were drug resistant or in a defined age group, such as  $<5$  years.

TABLE II. (Continued) Provisional cases of selected notifiable diseases ( $\geq 1,000$  cases reported during the preceding year), and selected\* low frequency diseases, United States and U.S. territories, weeks ending April 23, 2016, and April 25, 2015 (16th week)<sup>†</sup> (Export data)

U: Unavailable. —: No reported cases.

\* Mortality data in this table are voluntarily reported from 122 cities in the United States, most of which have populations of &gt;100,000. A death is reported by the place of its occurrence and by the week that the death certificate was filed. Fetal deaths are not included.

† Pneumonia and influenza.

§ Total includes unknown ages.
