Re: Endorsement of CDC's Model Aquatic Health Code

To Whom it may Concern,

As the leading manufacturer of onsite chlorine generators and ultraviolet light systems for the commercial swimming pool industry, ChlorKing has installed more than 14,000 commercial chlorine generators and ultraviolet light systems in the past 19 years in the United States, Canada, Mexico and the Caribbean. Together, our systems produce more than 30 million pounds of chlorine per year and sanitize more than 1 billion gallons of water each day.

ChlorKing has always promoted the safety of employees and patrons of commercial swimming pool venues. Our commitment to safety is why we support the efforts of the CDC and the establishment of the MAHC to make commercial pools safer.

Some US states have traditionally had strong, well-established codes to promote safe pools. Most states, however, have needed help in establishing codes that were both fair to equipment manufacturers, and pool builders – while holding them accountable – enabling the swimming pool industry to design and build safe facilities.

The MAHC is peer-reviewed and constantly modified by voting members of the industry, making it a constantly improving document.

ChlorKing urges all involved in the commercial swimming pool industry to embrace and support the MAHC, continuing our shared commitment to make facilities better and safer for all.

Sincerely
