Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Cause of death (Based on the International Classification of Diseases, Tenth Revision, Second Edition, 2004),

| Hispanic origin, race for non- | 40-44 | 45-49 | 50-54 | 55-59 | 60-64 | 65-69 | 70-74 | 75-79 | 80-84 | 85 years |
|--------------------------------|-------|-------|-------|-------|-------|-------|-------|-------|-------|----------|
| Hispanic population, and sex | years | and over |

Other and unspecified infectious and parasitic diseases and their sequelae (A00,A05,A20-A36,A42-A44,A48-A49,A54-A79,A81-A82,A85.0-A85.1,A85.8,A86-B04,B06-B09,B25-B49,B55-B99)

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

| Cause of death (Based on the Internation Classification of Diseases, Tenth Revision, Second Edition, 2004), | nal | | | | | | | | | |

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

Worktable Orig210R. Death rates for 113 selected causes, alcohol-induced causes, drug-induced causes, and injury by firearms, by 5-year age groups, specified Hispanic origin, race for non-Hispanic population, and sex: United States, 2006

[Rates per 100,000 population in specified group. Rates based on populations estimated as of July 1, 2006. Race and Hispanic origin are reported separately on the death certificate. Persons of Hispanic origin may be of any race. Data for Hispanic persons are not tabulated separately by race; data for non-Hispanic persons are tabulated by race. Data for Hispanic origin should be interpreted with caution because of inconsistencies between reporting Hispanic origin on death certificates and on censuses and surveys. For explanation of asterisks preceding cause-of-death codes, see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality"]

 $[\]ensuremath{^{\star}}$ Figure does not meet standards of reliability or precision.

^{0.0} Quantity more than zero but less than 0.05.

^{...} Category not applicable.

 $[\]ensuremath{\text{1/}}$ Figures for age not stated included in "All ages" but not distributed among age groups.

^{2/} Death rates for "Under 1 year" (based on population estimates) differ from infant mortality rates (based on live births).

^{3/} Figures for origin not stated are included in "All origins" but not distributed among specified origins.

^{4/} Includes Central and South American and Other and unknown Hispanic.

^{5/} Includes races other than white and black.

^{6/} Race categories are consistent with the 1977 Office of Management and Budget (OMB) standards. In 2006, multiple-race data were reported by California, Connecticut, District of Columbia, Florida, Hawaii, Idaho, Kansas, Maine, Michigan, Minnesota, Montana, Nebraska, New Hampshire, New Jersey, New Mexico, New York, Oklahoma, Oregon, Rhode Island, South Carolina, South Dakota, Texas, Utah, Washington, Wisconsin, and Wyoming. The multiple-race data for these areas were bridged to the single-race categories of the 1977 OMB standards for comparability with other areas; see http://www.cdc.gov/nchs and refer to "Detailed technical notes to the United States 2006 data - mortality."

^{7/} Included in selected categories.
