

System Requirements

The MMDS 2003 software (SuperMICAR, MICAR200, and ACME/TRANSAX) requires user PCs to be running a 32-bit operating system (Windows95, Windows98, WindowsNT, Windows2000) with at least the following minimum hardware specifications:

- IBM or IBM-compatible PC.
- Pentium 166 MHz processor.
- 32M RAM
- Hard Drive with adequate available space (100MB of free space is recommended)
- Color monitor, with screen resolution set to 800 x 600 pixels or greater, using standard Windows (small) fonts.
- CD-ROM drive for installation (not required, but highly recommended).
