Question ID: HHC.0240.00.1

Variable: AGE65

Module: Roster

Section: HHC

Description: Age 65 or older

File(s): Adult

Data type: Numeric

Responses:

<u>Response Code</u>	<u>Description</u>
1	Less than 65
2	65 or older
7	Refused
9	Don't Know

Universe Description: Person is 18 years or older but refused or don't know specific age

Notes: This variable is collected during rostering from a household respondent who answered refuse or don't know to the age of a household member who is subsequently selected as the Sample Adult, and for whom the household respondent indicated that the person is 18 and over. AGE65 may be inconsistent with AGE_P_A because AGE_P_A is confirmed with the Sample Adult respondent and uses date of birth to verify age. Analysts may use AGE65 when AGE_P_A is unknown for categorizing Sample Adults less than age 65 and 65 and over.

Section: UPP

Description: Disability status

File(s): Adult

Data type: Numeric

Responses:

<u>Response Code</u>	<u>Description</u>
1	Yes
2	No
9	Don't Know

Universe Description: Sample adults 18+

Notes: The final recode variable created for Washington Group Adult Composite Disability Indicator. Disability is defined by the reported level of difficulty (no difficulty, some difficulty, a lot of difficulty, or cannot do at all) in six functioning domains: seeing (even if wearing glasses), hearing (even if wearing hearing aids), mobility (walking or climbing stairs), communication (understanding or being understood by others), cognition (remembering or concentrating), and self-care (such as washing all over or dressing). Sample adults who responded "a lot of difficulty" or "cannot do at all" to at least one question were considered to have a disability.
