

## Health Insurance Coverage: Early Release of Quarterly Estimates From the National Health Interview Survey, July 2021–September 2022

by Robin A. Cohen, Ph.D. and Amy E. Cha, Ph.D., M.P.H.

Division of Health Interview Statistics, National Center for Health Statistics

Since 2001, the National Center for Health Statistics (NCHS) National Health Interview Survey (NHIS) Early Release Program has released selected estimates of health and health care for the civilian noninstitutionalized U.S. population. Table 1 presents quarterly estimates of health insurance coverage disaggregated by age group and family income as a percentage of the federal poverty level (FPL) for the civilian noninstitutionalized U.S. population based on data from the July–September 2022 NHIS. Table 2 presents quarterly population estimates of health insurance coverage disaggregated by age group. Table 3 presents quarterly estimates of health insurance coverage for adults aged 18–64 disaggregated by race and ethnicity. Table 4 presents quarterly estimates of health insurance coverage for adults aged 18–64 disaggregated by region. Quarterly estimates for July–September 2021 through April–June 2022 are also presented for comparison. These estimates are being published prior to final data editing and final weighting to provide access to the most recent information from the NHIS.

### List of Tables

**Table 1. Percentage (and 95% confidence interval) of people who lacked health insurance coverage, had public health plan coverage, and had private health insurance coverage at the time of interview, by age group, family income as a percentage of the federal poverty level and quarter: United States, July 2021–September 2022**

**Table 2. Number (millions) of people who lacked health insurance coverage, had public health plan coverage, and had private health insurance coverage at the time of interview, by age group and quarter: United States, July 2021–September 2022**

**Table 3. Percentage (and 95% confidence interval) of adults aged 18–64 who lacked health insurance coverage, had public health plan coverage, and had private health insurance coverage at the time of interview, by race and ethnicity, and quarter: United States, July 2021–September 2022**

**Table 4. Percentage (and 95% confidence interval) of adults aged 18–64 who lacked health insurance coverage, had public health plan coverage, and had private health insurance coverage at the time of interview, by region, and quarter: United States, July 2021–September 2022**

**Table 1. Percentage (and 95% confidence interval) of people who lacked health insurance coverage, had public health plan coverage, and had private health insurance coverage at the time of interview, by age group, family income as a percentage of the federal poverty level and quarter: United States, July 2021–September 2022**

Health insurance coverage status, age group (years) and family income as a percentage of the FPL <sup>1</sup>	Quarter 3, 2021 (Jul–Sep)	Quarter 4, 2021 (Oct–Dec)	Quarter 1, 2022 (Jan–Mar)	Quarter 2, 2022 (Apr–Jun)	Quarter 3, 2022 (Jul–Sep)
<b>Uninsured<sup>2</sup></b>

\*Estimate is not shown, as it does not meet NCHS standards of reliability.

<sup>1</sup>FPL is federal poverty level. The percentage of respondents in the unknown FPL category in the third quarter of 2021 was 12.4%, in the fourth quarter of 2021 was 12.6%, in the first quarter of 2022 was 13.7%, in the second quarter of 2022 was 13.7% and in the third quarter of 2022 was 13.2%. Estimates may differ from estimates that are based on both reported and imputed income.

<sup>2</sup>People were defined as uninsured if they did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. People were also defined as uninsured if they had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>3</sup>Public health plan coverage includes Medicaid, CHIP, state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of people were covered by both public and private plans and were included in both categories.

<sup>4</sup>Private health insurance coverage includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, purchased through local or community programs, or purchased through the Health Insurance Marketplace or a state-based exchange. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of people were covered by both public and private plans and were included in both categories.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey (NHIS). Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ from estimates based on final files. The estimates are based on a sample of the population and therefore are subject to sampling error. Quarterly estimates have wider confidence intervals than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Data are based on household interviews of a sample of the civilian noninstitutionalized population.

Non-Hispanic, other races and multiple races	32.2 (20.3–46.1)	30.6 (21.6–40.8)	28.3 (20.1–37.9)	38.1 (27.0–50.1)	*
<b>Private health insurance coverage<sup>4</sup></b>					
Total	67.3 (65.5–69.1)	66.4 (64.6–68.2)	68.7 (66.6–70.7)	67.5 (65.9–69.1)	67.1 (65.2–69.0)
Hispanic	48.3 (44.6–52.0)	47.1 (42.6–51.7)	51.7 (47.4–55.9)	47.5 (43.4–51.6)	48.8 (45.5–52.1)
Non-Hispanic White	75.8 (73.5–77.9)	74.8 (72.9–76.6)	77.3 (75.1–79.3)	76.2 (74.3–78.0)	75.0 (72.7–77.1)
Non-Hispanic Black	55.2 (50.2–60.2)	53.7 (48.6–58.6)	54.0 (48.8–59.2)	58.0 (53.2–62.7)	58.7 (53.5–63.7)
Non-Hispanic Asian	77.1 (70.8–82.7)	74.9 (70.3–79.1)	73.1 (66.9–78.7)	74.3 (69.4–78.8)	76.7 (70.5–82.2)
Non-Hispanic, other races and multiple races	52.5 (39.0–65.8)	59.5 (49.2–69.3)	58.5 (48.0–68.5)	55.2 (41.3–68.5)	*

\*Estimate is not shown, as it does not meet NCHS standards of reliability.

<sup>1</sup>Hispanic origin and race are two separate and distinct categories. People of Hispanic or Latino origin may be of any race or combination of races. Hispanic or Latino origin includes people of Mexican, Puerto Rican, Cuban, Central and South American, or Spanish origin. Race is based on respondents' descriptions of their own racial background. More than one race may be reported. For conciseness, this table uses shorter versions of the 1997 Office of Management and Budget terms for race and Hispanic or Latino origin. For example, the category "not Hispanic, Black or African American, single race" is referred to as "non-Hispanic Black" in the tables. Estimates for non-Hispanic people of races other than White only, Black only, and Asian only, or of multiple races, are combined into the "non-Hispanic, other races and multiple races" category.

<sup>2</sup>People were defined as uninsured if they did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. People were also defined as uninsured if they had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>3</sup>Public health plan coverage includes Medicaid, CHIP, state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of people were covered by both public and private plans and were included in both categories.

<sup>4</sup>Private health insurance coverage includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, purchased through local or community programs, or purchased through the Health Insurance Marketplace or a state-based exchange. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care. A small number of people were covered by both public and private plans and were included in both categories.

NOTES: These health insurance estimates are being released prior to final data editing and final weighting to provide access to the most recent information from the National Health Interview Survey (NHIS). Occasionally, due to decisions made for the final data editing and weighting, estimates based on preliminary editing procedures may differ from estimates based on final files. The estimates are based on a sample of the population and therefore are subject to sampling error. Quarterly estimates have wider confidence intervals than annual estimates due to smaller sample sizes, and this should be taken into account when evaluating the statistical significance of differences between groups and changes over time. Data are based on household interviews of a sample of the civilian noninstitutionalized population.

<sup>1</sup>In the geographic classification of the U.S. population, states are grouped into four regions used by the U.S. Census Bureau. Northeast includes Maine, New Hampshire, Vermont, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, and Pennsylvania. Midwest includes Ohio, Indiana, Michigan, Wisconsin, Minnesota, Iowa, Missouri, North Dakota, Nebraska, and Kansas. South includes Delaware, Maryland, District of Columbia, Virginia, West Virginia, North Carolina, South Carolina, Georgia, Florida, Kentucky, Tennessee, Alabama, Mississippi, Arkansas, Louisiana, Oklahoma, and Texas. West includes Montana, Idaho, Wyoming, Colorado, New Mexico, Arizona, Utah, Nevada, Washington, Oregon, California, Alaska, and Hawaii.

<sup>2</sup>People were defined as uninsured if they did not have any private health insurance, Medicare, Medicaid, Children's Health Insurance Program (CHIP), state-sponsored or other government-sponsored health plan, or military plan. People were also defined as uninsured if they had only Indian Health Service coverage or had only a private plan that paid for one type of service, such as accidents or dental care.

<sup>3</sup>Public health plan coverage includes Medicaid, CHIP, state-sponsored or other government-sponsored health plan, Medicare, and military plans. A small number of people were covered by both public and private plans and were included in both categories.

<sup>4</sup>Private health insurance coverage includes any comprehensive private insurance plan (including health maintenance and preferred provider organizations). These plans include those obtained through an employer, purchased directly, purchased through local or community programs, or purchased through the Health Insurance Marketplace or a state-based exchange. Private coverage excludes plans that pay for only one type of service, such as accidents or dental care.
