

CORRECTION TO SMITH ET AL. (2001)

The following is a correction to the paper by Smith et al. (2001). Table 3 contains some minor errors. At the time the paper was completed, the authors were not aware that information from one quarter of 1999 was still provisional. A corrected table is given below.

Table 3. Key Monitoring Indicators for 1999 NIS

ROW	KEY INDICATOR	NUMBER	PERCENT
<u>Monitoring Indicators for the RDD Phase of the NIS</u>			
1	Total Selected Sample in Released Replicates	2,533,608	--
2	Phone Numbers Resolved before CATI	483,903	19.1% (Row 2/Row 1)
3	Total Phone Numbers Called	2,049,705	--
4	Advance Letters Mailed	746,824	36.4% (Row 4/Row 3)
5	Resolved Phone Numbers – <i>Resolution Rate</i>	2,243,904	88.6% (Row 5/Row 1)
6	Households Identified	1,009,543	45.0% (Row 6/Row 5)
7	Households Successfully Screened for Presence of Age-Eligible Children – <i>Screening Completion Rate</i>	979,606	97.0% (Row 7/Row 6)
8	Households with no NIS Age-Eligible Children	943,268	96.3% (Row 8/Row 7)
9	Households with NIS Age-Eligible Children – <i>Eligibility Rate</i>	36,338	3.7% (Row 9/Row 7)
10	Households with NIS Age-Eligible Children with Completed RDD Interviews– <i>Interview Completion Rate</i>	33,932	93.4% (Row 10/Row 9)
11	CASRO Response Rate	NA	80.2% (Row 5 x Row 7 x Row 10)
12	Age-Eligible Children with Completed RDD Interviews	34,442	--
<u>Monitoring Indicators for the PRC Phase of the NIS</u>			
13	Children with Consent Obtained to Contact Vaccination Providers	28,936	84.0% (Row 13/Row 12)
14	Immunization History Questionnaires Mailed to Providers	37,373	--
15	Immunization History Questionnaires Returned from Providers	35,517	95.0% (Row 15/Row 14)
16	Children with Adequate Provider Data	22,521	65.4% (Row 16/Row 12)
