**Appendix 7b: List of Restricted-Use (RDC-only) Analytic Variables for Male File**

**NOTE:** This appendix lists all analytic NSFG variables that have been suppressed or modified on the public-use male file, but are made available through the NCHS Research Data Center. Please see Appendix 7a for a similar list of RDC-only variables for the female respondent and pregnancy files. Please see Appendix 7c for further information on the variables that have been **created or modified** for inclusion on the public-use NSFG files.

Most of these variables have been included on the NSFG public-use male file in some form – e.g., with fewer categories, with some values top- or bottom-coded, or with new variables to summarize information from several variables. Those measures were taken to minimize the risk of inadvertent disclosure, but the full detail of these analytic variables remains accessible through the NCHS Research Data Center. The variables beginning with "IN" are available on the public-use file with the same variable name, minus the "IN."

Variables in red are being suppressed or modified for the first time in 2017-2019 or had their modifications revised for 2017-2019.

**Appendix 7b: List of Restricted-Use (RDC-only) Analytic Variables for Male File**

**NOTE:** This appendix lists all analytic NSFG variables that have been suppressed or modified on the public-use male file, but are made available through the NCHS Research Data Center. Please see Appendix 7a for a similar list of RDC-only variables for the female respondent and pregnancy files. Please see Appendix 7c for further information on the variables that have been **created or modified** for inclusion on the public-use NSFG files.

Most of these variables have been included on the NSFG public-use male file in some form – e.g., with fewer categories, with some values top- or bottom-coded, or with new variables to summarize information from several variables. Those measures were taken to minimize the risk of inadvertent disclosure, but the full detail of these analytic variables remains accessible through the NCHS Research Data Center. The variables beginning with "IN" are available on the public-use file with the same variable name, minus the "IN."

Variables in red are being suppressed or modified for the first time in 2017-2019 or had their modifications revised for 2017-2019.

NSFG 2017-2019 User's Guide

Appendix 7b: List of Restricted-Use (RDC-only) Analytic Variables for Male File

**NOTE:** This appendix lists all analytic NSFG variables that have been suppressed or modified on the public-use male file, but are made available through the NCHS Research Data Center. Please see Appendix 7a for a similar list of RDC-only variables for the female respondent and pregnancy files. Please see Appendix 7c for further information on the variables that have been **created or modified** for inclusion on the public-use NSFG files.

Most of these variables have been included on the NSFG public-use male file in some form – e.g., with fewer categories, with some values top- or bottom-coded, or with new variables to summarize information from several variables. Those measures were taken to minimize the risk of inadvertent disclosure, but the full detail of these analytic variables remains accessible through the NCHS Research Data Center. The variables beginning with "IN" are available on the public-use file with the same variable name, minus the "IN."

Variables in red are being suppressed or modified for the first time in 2017-2019 or had their modifications revised for 2017-2019.

**Appendix 7b: List of Restricted-Use (RDC-only) Analytic Variables for Male File**

**NOTE:** This appendix lists all analytic NSFG variables that have been suppressed or modified on the public-use male file, but are made available through the NCHS Research Data Center. Please see Appendix 7a for a similar list of RDC-only variables for the female respondent and pregnancy files. Please see Appendix 7c for further information on the variables that have been **created or modified** for inclusion on the public-use NSFG files.

Most of these variables have been included on the NSFG public-use male file in some form – e.g., with fewer categories, with some values top- or bottom-coded, or with new variables to summarize information from several variables. Those measures were taken to minimize the risk of inadvertent disclosure, but the full detail of these analytic variables remains accessible through the NCHS Research Data Center. The variables beginning with "IN" are available on the public-use file with the same variable name, minus the "IN."

Variables in red are being suppressed or modified for the first time in 2017-2019 or had their modifications revised for 2017-2019.
