

Hemovigilance Module: How to address component alerts

System alerts notify users about missing data or unaccepted confer rights agreements.

1

The **Alerts** tab on the navigation bar leads to the **Action Items** page where alerts for missing data and unaccepted confer rights agreements are listed.

COMPLETE THESE ITEMS

ALERTS

- 11 Missing Incidents
- 8 Missing Adverse Reactions
- 16 Missing Denominator Forms

2

Each alert will direct users to the missing data collection form on the **Missing/Incomplete lists** page.

3

Select the type of form on the **Missing/Incomplete Lists** page.

Missing/Incomplete Lists

Missing Incidents | **Missing Adverse Reactions** | Missing Denominator Data

Page 1 of 1

Module	Month/Year	Alert Type	Report No Events
HV	06/2012	No Adverse Reactions Add Reaction	<input type="checkbox"/>

4

For example, choose 'Report No Events' if your facility has no events to report for that month. Or, Choose 'Add Reaction' to access the missing data form.

Hemovigilance Module: How to address component alerts

5

Select the 'Missing Denominator Data' tab to view missing denominator forms.

6

Select 'Add denominators' to access the missing form.

Module	Month/Year	Alert Type
HV	01/2013	No denominators Add denominators

Important Tips

- Report No Events boxes cannot be checked if a Monthly Reporting Denominators form for the corresponding month(s) has not been entered.
- “Confer rights not accepted” alert reminds users that a Group they are a member of has updated their data rights request. Click the link to accept the changes. Only users with Administrators Rights in the Hemovigilance Module will see this alert.
