Instructions for Completion of the COVID-19 Long-term Care Facility (LTCF) Resident Therapeutics Form (CDC 57.158)

Data Field	Instructions for Form Completion
NHSN Facility ID #	The NHSN-assigned facility ID will be **auto-generated** by the system.
CMS Certification Number (CCN)-may be referred to as participation number	**Auto-generated** by the computer, if applicable, based on the CCN entered during NHSN registration or last updated, if previously edited. Please see NHSN CCN Guidance document for instructions on how to add a new CCN or edit an existing CCN.
Facility Name	**Auto- generated** by the system based on the facility name previously entered during NHSN registration.
Date for which counts are reported	**Required**. Select the date on the calendar in which the counts are being reported in the NHSN LTCF COVID-19 Module-*Therapeutics Pathway*.
Facility Type	**Auto generated** based on the facility type selected during NHSN enrollment. Selections include: • LTC-ASSIST – Assisted Living Residence • LTC-ICF/IID – Intermediate Care Facilities for Individuals with Intellectual Disabilities. • LTC-SKILLNURS – Skilled Nursing Facility $^+$ $^+$Includes both skilled nursing facilities and nursing homes • LTC-PSYCH – Psychiatric Residential Treatment Facility • LTC - SVHALF – Assisted Living Facility for Sate Veteran's Homes • LTC - SVHSNF – Skilled Nursing Facility for State Veteran's Homes Please see NHSN Guidance document for instructions on *How to Correct Your Facility Type* if the autogenerated information is incorrect.
Date Created	**Auto generated** based on the first calendar date and time that a user manually enters and saves data or the date the facility first submits a CSV file for a specific pathway. *Note:* The date and time will automatically generate after the "Save" button is selected and **cannot** be modified.

> **Important:**
>
> **Report total counts for the below questions only one calendar day during the reporting week and include <u>only the number of residents who were newly administered a therapeutic since the previously reported counts</u>. If the count is zero, a "0" must be entered as the response. A blank response is equivalent to missing data.**

Data Field	Instructions for Form Completion
Therapeutic For each therapeutic listed, enter the number of residents who received the therapeutic at this facility or elsewhere **during the current reporting week only**. **Important:** Do **not** report cumulative counts.	*Therapeutic* is defined as a treatment, therapy, or drug. Monoclonal antibodies are examples of anti-SARS-CoV-2 antibody-based therapeutics used to help the immune system recognize and respond more effectively to the COVID-19 virus. Since the last date these counts were collected for reporting to NHSN, indicate the number of residents who received one or more of the listed therapeutics, based on: • **In-house stock** that was stored at your facility (specifically, either administered by your LTCF or by an outside entity using stock provided by your LTCF). • Stock that was **stored at another facility**, such as an infusion center or hospital. **Important:** • The reported counts must include only the number of newly administered therapeutics since the last date in which therapeutic counts were reported to NHSN. • If there were no residents who received one or more of the listed therapeutics during the reporting week, a zero ("0") is to be reported for each listed therapeutic. A blank field could be interpreted as missing data. • Counts include resident(s) who received the listed therapeutic during the reporting week regardless if the therapeutic was administered to the resident while in the LTCF or while in another facility. **Example:** During **this reporting week**, a total of **7** residents received a therapeutic (specifically, were treated with monoclonal antibodies or antivirals). • **Resident A** was transferred to the emergency department where he received an infusion with *Sotrovimab (GlaxoSmithKline)*, so he was included in the *Sotrovimab (GlaxoSmithKline)* count in the second column [1]. • **Residents B and C** were treated in their LTCF with *Regeneron's Casirivimab plus Imdevimab (Regeneron)* by an infusion nurse who administered the infusions <u>from stock stored at the LTCF</u>, so they were included in the *Casirivimab plus Imdevimab (Regeneron)* count in the first column [2]. • **Resident D** was treated with *Bamlanivimab and etesevimab (Lilly)* by an infusion nurse who brought the <u>therapeutic from an outside pharmacy</u>, so the resident was included in the *Bamlanivimab and etesevimab* count in the second column [1]. • **Resident E** was treated with *Evusheld (AstraZeneca)* in the facility from stock stored at the facility, so the resident was included in the *Evusheld (AstraZeneca)* count in the first column [1]. • **Residents F and G** both received *Paxlovid (Pfizer)* while in the facility from stock stored within the facility. They were included in *Paxlovid (Pfizer)* count in the first column [2].

The below counts were reported to NHSN for the reporting week.

2 *Casirivimab plus Imdevimab (Regeneron)* stock stored at the facility

1 *Bamlanivimab and etesevimab (Lilly)* stock stored at **another** facility

1 *Sotrovimab (GlaxoSmithKline)* stock stored at **another** facility

1 *Evusheld (AstraZeneca)* stock stored at the facility

2 *Paxlovid (Pfizer)* stock stored at the facility
