I am reading over some drugs that are on this list-anticonvulsants,anticoagulants,antibiotics and vitamins. I can understand antineoplastics and radiologic drugs. It is ridiculous how far government has gone to regulate Americans lives.

As a pharmacist in the hospital industry,it will increase the cost of operating to an industry that is already full of too many regulations. It will raise the cost of liability insurance to cover cost of ligation by overly zealous individuals in the legal profession.

Stop this senseless over regulation and allow individuals to take care of themselves
