This is a very serious problem that has not received the attention and resources needed to combat it. I have been severely affected by working in a sick building for 25 years. I actually had to be moved to a different department so I no longer had to work in the sick building. For the last few years that I worked in that building, I needed to wear an N95 respirator to prevent getting sick. I have lasting health effects that I will probably have for the rest of my life and my life may very likely be shorter than it would have if I had not worked in that building.
