

NIOSH Board of Scientific Counselors  
Evaluation Capacity-Building Plan Score Sheet

In response to a Government Performance and Results Act (GPRA) measure, the NIOSH Board of Scientific Counselors (BSC) is requested to annually assess NIOSH's progress implementing its Evaluation Capacity-Building (ECB) Plan through 2025. The Board should use the standardized rubric below to assign a consensus score for the progress NIOSH has made implementing the Plan in 2021. Scores may only be assigned in whole or half number increments (e.g. 4 or 4.5). Target dates (e.g. Year 1, Year 2, Year 3, etc.) for completion of each key learning activity in the ECB Plan are indicated at the end of each stated activity in the Plan. It is up to the BSC to determine the definition of each level of progress made (very good progress, good progress, etc.).

How would the Board rate NIOSH's progress implementing its Evaluation Capacity-Building Plan during Year 1 (2021)?

5	NIOSH has made very good progress implementing its ECB Plan and met all targets for Year 1.
4	NIOSH has made good progress implementing its ECB Plan and met most targets for Year 1.
3	NIOSH has made fair progress implementing its ECB Plan and met some targets for Year 1.
2	NIOSH has made poor progress implementing its ECB Plan and met a few targets for Year 1.
1	NIOSH has made very poor progress implementing its ECB Plan and met none of the targets for Year 1.

  5   NIOSH BSC Score Year 1
