Meeting ID: 160 6763 3819  
Participants ID: #  
Meeting Password: 98685439

*Welcome and roll-call/introductions*

1. DCAS follow-up to the M&C WG and WG discussion regarding:
  - a. fires and explosions
  - b. drain line operations during the residual period, and sample data from one pipe in the west end of Building 10 that was one million dpm/100 cm<sup>2</sup>
  - c. HFIR alpha contamination surveys
  - d. consolidation of dose models into a single document
  - e. the use of mound data, including a response to M&C WG concerns that this site has many unique circumstances that were not present at the surrogate site and reassessment of if it meets surrogate criteria.
2. Petitioners comments (optional to petitioner)
3. SC&A review of NIOSH's final approach for the one-to-one ratio NIOSH did using building 10 subsurface real data.
4. DCAS/SC&A/WG review and discussion of the current model of ingestion of radioactive materials
5. DCAS/SC&A/WG discussion of disturbance of the burial ground prior to 1992 and consideration of the uses and impact of 1992 CPS burial ground data on the NIOSH Exposure Model.
6. WG discussion of path forward

*Adjourn*
