

Report on Blind Cases Evaluated by Work Group

David Kotelchuck, Chair

Advisory Board on Radiation and Worker Health, Dose Reconstruction
Review Methods Work Group

March 11, 2024

Facilities Covered by 49 Blind Cases

Number of blind cases *	Facilities
9	Hanford
7	Oak Ridge Y-12, Rocky Flats Plant
5	Savannah River Site
4	Feed Materials Production Center, Oak Ridge X-10
3	Nevada Test Site, Los Alamos National Laboratory
2	PNNL, Grand Junction, LLNL, Sandia, Oak Ridge K-25
1	17 other unique facilities

* Some cases have more than one facility with covered employment.

Years Employed Among 49 Blind Cases

Years employed	Number (percent)
Less than 10 years	9 (18%)
10–19.9	12 (25%)
20–29	11 (22%)
30–39	13 (27%)
40–49	4 (8%)
Total	49

Gender of the 49 Blind Cases

- Of 49 blind cases reviewed:
 - 11 cases (22%) were female
 - 38 cases (78%) were male
- As of November 2015, 13.6% of total claims involved a female energy employee (EE)
- Evidence suggests current claims have a higher percentage of female EEs
