COMMITTEE MANAGEMENT

Zaida Burgos
Atlanta, Georgia

January 31, 2013

The Honorable Kathleen Sebelius
Secretary
Department of Health and Human Services
200 Independence Avenue, S.W.
Washington, D.C. 20201

Dear Madam Secretary:

The Advisory Board on Radiation and Worker Health (The Board) has evaluated Special Exposure Cohort (SEC) Petition 00105 concerning workers at General Steel Industries in Granite City, Illinois, under the statutory requirements established by the Energy Employees Occupational Illness Compensation Program Act of 2000 and incorporated into 42 C.F.R. § 83.13.

The National Institute for Occupational Safety and Health (NIOSH) has recommended that individual dose reconstructions are feasible for:

“All individuals who worked in any location at the General Steel Industries site, located on 1417 State Street, Granite City, Illinois, from January 1, 1953, through June 30, 1966, and/or during the residual radiation period from July 1, 1966, through December 31, 1992.”

NIOSH found that it has access to adequate exposure monitoring and other information necessary to do individual dose reconstructions with sufficient accuracy for members of this group, and therefore a class covering this group should not be added to the SEC. The Board concurs with this determination.

Based on these considerations and the discussion at the December 11 and 12, 2012, Board meeting held in Knoxville, Tennessee, the Board recommends that this class not be added to the SEC.

Enclosed is the documentation from the Board meeting(s) where this SEC class was discussed. The documentation includes copies of the petition, the NIOSH review thereof, and related materials. If any of these items are unavailable at this time, they will follow shortly.

Sincerely,

[Signature on file]

James M. Melius, M.D., Dr. PH
Chairman, ABRWH
