## PREVENT FALLS Collaborate with Community Pharmacists

### What does this mean for your practice?

- ▶ **STEADI-R<sub>x</sub>** is a pharmacy initiative to reduce the risk of falls in older adults through collaboration between healthcare providers and pharmacists. It was developed by the University of North Carolina Eshelman School of Pharmacy and School of Medicine through a grant from the Centers for Disease Control and Prevention.
- ▶ Community pharmacists will screen older adults using the three STEADI questions and review the patient's profile to identify medications that may increase the risk of falls.
- ▶ Collaboration with a community pharmacist can help you meet **quality metrics** related to falls and high-risk medications and improve fall-related outcomes.
- ▶ We request that you review the pharmacist's recommendations and fax a response back to the pharmacy. Additional information is available at [www.cdc.gov/steady](http://www.cdc.gov/steady).

### How **STEADI-R<sub>x</sub>** works:
