## Met ei TB?

Tuberculosis (TB) a fisita seni och menun paiking iten *Mycobacterium tuberculosis* (*M. tuberculosis*). Ewe menun paiking, ika germs a fiuw ngeni ach neenien ngasangas. Menun TB a tongeni fiuw ngeni ese nifinifin pisekin non inisich, awewe ren ewe kitni, spine, ika mokurach.

Mi wor porous murino. Aramas mi wor rer TB ra tongeni angei sefei ika ir mi kuta aninisin sefei.

## Pwata TB ew osukosuk non fonuwen United States?

Mi wor epetin me sefeien TB mi pwan itifouno pwun ei semwen a kon senuk ninin me nein menun semwen meinisin non fonufan. Ika mi wor remw menun TB mi tongeni tori ekoch iwe en mi tongeni ngeni ekoch ei menun TB. Me non ekewe ier a no, United States a repotei pwun a kisitiw nampan fite chon urir TB non rekort, nge chomong aramas mi chuen urir TB. Ika mwo pwun a kisitiw nunun, TB mi chuen sopwosopw ne aifisata osukosuk. Ika mwo pwun nampan me nunun TB non United States a kisitiw, nunun TB mi chuen watte nein ekoch aramas me mi feito seni och fonu ika eoreni ese usun nunun chon White (Pwech). Ei a fis pokiten ekewe ekoch mwichen aramas a mecheres ngenir ekewe metoch mi efisata menun TB a tongeni anapono an epwe torir ewe semwen (katton [paich 7](#)).

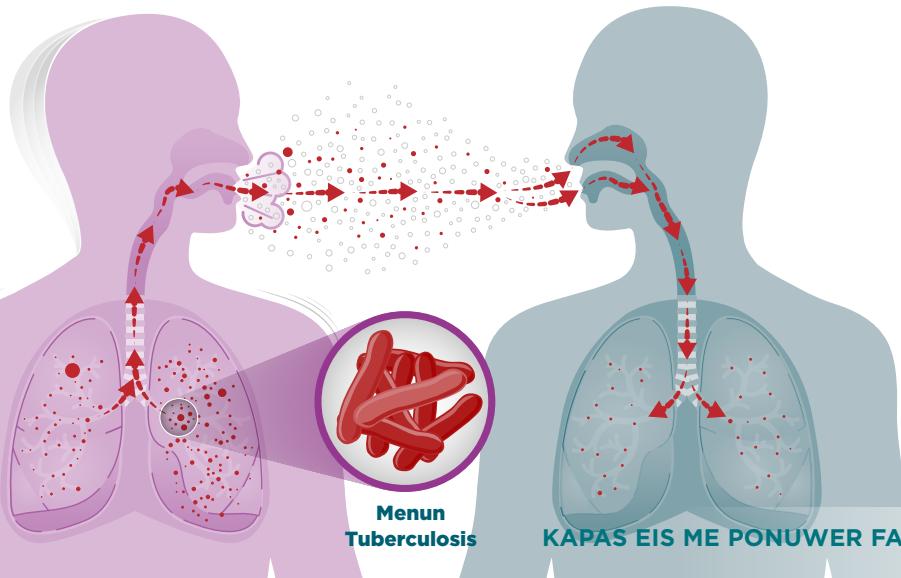

Ei pwuk a ponuweni ekoch kapas eis faniten TB. Kose mochen eisini noumw daktor, kangof, ika chon awora omw tumwun ika mei wor sopwosopwen kapas eis.

## Ifa usun an TB a fetan fein?

TB a fetan fein non asepwan seni emon aramas ngeni emon. Ekewe menun TB ra kus fetan non asepwan nupwen emon mi wor ren ewe semwenin TB non ar neenien ngasangas ika chiorer ra naw, fos, ika keen. Chon noumw aron ra tongeni ngasonong ewe menun TB iwe a torir ewe semwen.

Nupwen emon a ngasonong ekewe menun TB, ewe menun TB a tonong non ar neenien ngasangas iwe a poputa ne mamarita. Seni ei fansoun, ekewe menun TB ra mwokut

fetan non cha  
ngeni ekoch  
neenien non  
inisir, awewe ren  
ewe kitni, spine,  
ika tupu.

## Io mi mecheres ngeni epwe torir TB?

Aramas meinisin ra tongeni urir TB. Ekoch aramas a kon mecheres ngenir an epwe torir menun TB:

- » Aramas ir mi kane ngeni emon mi wor ren ewe semwenin menun TB
- » Ekewe aramas ra uputiw non ika sai fetan ngeni ekewe fonu mi chomong chon semwenin TB non, mei pachonong Mexico, Filipin, Vietnam, India, China, Haiti, Guatemala, me ekoch fonu mi chomong chon urir TB non
- » Ekewe chon angangen tumwun ra angang ika nomw non ekewe neeni mi watte fetanen TB me non, awewe ren neenien homeless, kanapus, me neenien tumwunun aramas

## Met ei menun TB ese pwapwano (LTBI)?

Napengeni aramas ra ngasonong ekewe menun TB mi afisi semwen, inisir a tongeni fiuw ngeni ewe menun TB an esapw marita. Ekei menun TB ra apwangapwangongo, nge mi chok pwan tongeni pochokun sefan non ewe inisir non pwan och fansoun. Ei sia eita ngeni pwe menun TB ese pwapwano, ika LTBI ren amwochan.

Aramas mi wor rer LTBI

- » Ese wor rer ekewe esisinen semwen.
- » Resapw mefi semwen.
- » Rese tongeni ngeni ekoch ewe menun TB.
- » Napengeni ir repwe tes positive ren tesin TB non cha ika tesin TB won kinir.
- » Ir mi tongeni torir semwenin TB ika resapw kuta sefei ren LTBI ([katton paich 13](#)).

Aramas mi wor rer LTBI ese wor rer ekewe esisinen semwen, iwe ir rese pwan tongeni ngeni ekoch ewe menun TB. Nge, ika ekei menun TB ra pochokun sefan me non ewe inis me napono, ewe aramas a tongeni mwet seni LTBI ngeni an tori ewe semwenin TB. Ren ei wewe, ekewe aramas mi torir LTBI mi och repwe angei sefeien an epwe epetir pwe esapw marita ewe semwenin TB. Sefeien LTBI mi ouchea ren epetin me tumwunun TB me non United States pwun a ekisatiw fisefisen an emon mi wor rer LTBI epwe torir ewe semwenin TB.

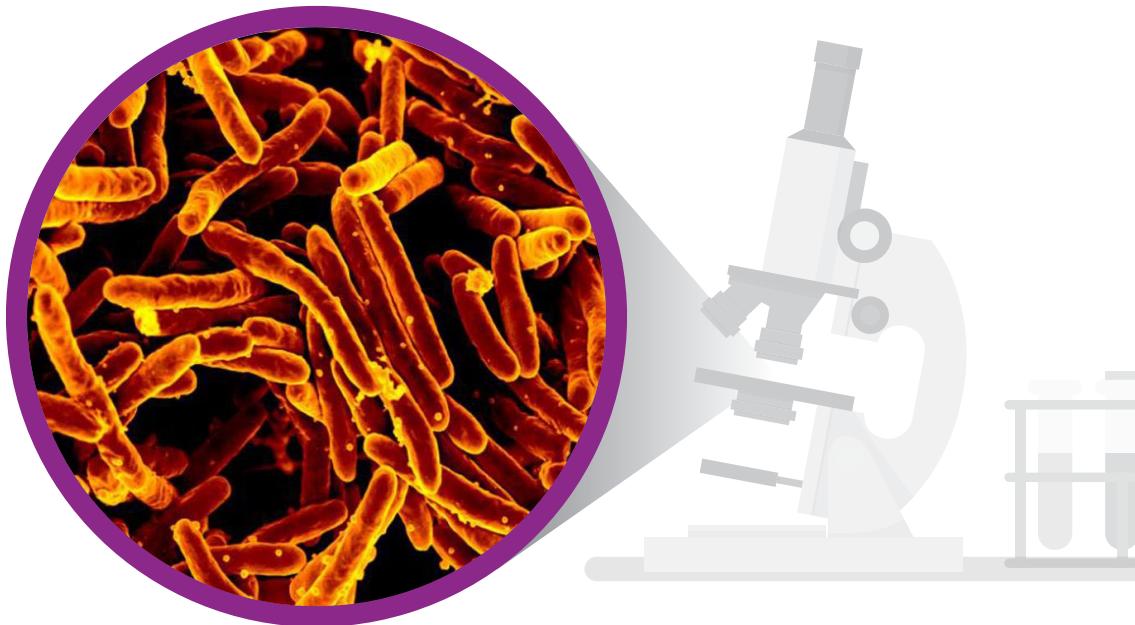

## Met ei semwen TB?

Ika ewe immune system ese tongeni oukano ekewe menun TB ar resapw marita me napono, ekewe menun TB ra poputa ne inet me paras fetan non ewe inis, iwe ei a efisata ewe semwenin TB. Ekewe menun TB ra fiuw ngeni ewe inis, ika a fis ei metoch non ach neenien ngasangas, ekewe menun TB ra tongeni ata ika pwisi ewe neenien ngasangas. Ekoch aramas a torir semwenin TB murin chok ar torir ewe menun semwen (non fite chok wiik) me mwen ar immune a tongeni fiuw ngeni ewe menun TB. Ekoch aramas mi torir menun TB ese pwapwano nge resapw semwen tori fite ier, nupwen ar immune system a apwangepwang ren pwan och wewe. Sefeien menun TB ese pwapwano (LTBI) mi manaman ren epetin ewe semwenin TB.

Aramas mi wor ewe semwenin TB non ar neenien ngasangas ika chiorer mi tongeni ngeni ekoch ewe semwen, wewen pwun ra tongeni ngeni ar famini, chiechier, me ekoch aramas unukir ewe menun TB. Aramas mi wor rer TB non pwan och neenien non inisir, awewe ren ar kitni, spine, napengeni rese tongeni ngenir keoch ewe semwen.

Ekewe aramas mi wor ren semwenin TB napengeni repwe nukei ewe menun TB ngeni ekewe aramas ra asoso fengen rer iteiten ran. Ei mi pachonong chon ar famini, chiechier, chiener ne angang, me chiener non sukuun.

Aramas mi wor rer ewe semwenin TB mi ouchea repwe angei ekoch sefei nupwen ar poputa ne angei sefei. Murin ar angei sefeien TB non fite week, emon a daktor epwe erenir pwun rese chuen tongeni ngeni ekoch ewe menun TB. Napengeni aramas mi wor rer semwenin TB repwe angei sefeien TB non 6 maram me mwen repwe chikar sefan.

## **Io ra arap ngenir repwe torir ei semwen TB?**

Chomong aramas mi wor rer ewe menun TB ese pwapano (LTBI) resapw mwo urir ewe semwenin TB. Esapw aramas meinisin mi wor rer LTBI epwe urir semwenin TB, ukukun 5-10% nein ekei aramas epwe napono me torir semwenin TB non manawer, ika resapw angei sefeien. Sia esuku pwun fefetanen seni LTBI ese sefei ngeni semwenin TB epwe tori 80% ren nunun TB keis non U.S. Ekoch aramas mi wor rer LTBI napengeni esapw marita ika napono ngeni semwenin TB. Ekewe aramas mi mutir ngenir mamaritan semwenin TB ra nomw non ruu kinikinin:

**1**

Ekewe ir mi keran torir menun TB

**2**

Ekewe mi wor ar semwen mi afisi ar immune system epwe apwangepwang mei pachonong:

**Menun HIV**

**Aia ngaw sefei (awewe ren aian drugs)**

**Ir mi angei sefeien rheumatoid arthritis ika semwenin Crohn's.**

**Mi ekesiwin peirakin inisir**

**Watte semwenin kitni**

**Cancer non chamwer ika uwer**
