

Health Effects of 9/11: An Online Exhibition

The World Trade Center Health Program presents Health Effects of 9/11, an online exhibition.

This exhibition is devoted to raising awareness about the ongoing health effects linked to 9/11 exposures.

Developed in partnership with the David J. Sencer CDC Museum, the exhibition is dedicated to all people impacted by 9/11, including those who lost their lives that day, those who have died from 9/11-related illnesses, and those who continue to struggle with 9/11-related illness or injury.

Exhibition Highlights

The Health Effects of 9/11 exhibition features:

- information on 9/11 exposures and the emergence of World Trade Center-related health conditions,
- the events and advocacy that established the World Trade Center Health Program,
- research achievements that led to improvements in medical treatment and knowledge, and
- multimedia components such as videos, illustrations, and compelling images including photographs by renowned photographers Richard Wiesel and Earl Dotter.

Some of the content and images in this exhibition may be sensitive in nature to some audiences, especially responders and survivors of 9/11.
