

About the World Trade Center (WTC) Health Program

The WTC Health Program provides medical monitoring and treatment to eligible Responders who were affected by the September 11th attacks in New York City (NYC), the Pentagon, and Shanksville, Pennsylvania sites. The Program also provides benefits to eligible Survivors of the NYC Disaster Area.

Care for WTC-related health conditions is provided at no-cost to members when care is received through Program-affiliated providers.

The Program provides these services through Clinical Centers of Excellence (CCEs) for members in the New York metropolitan area, or through the Nationwide Provider Network (NPN) for members across the country.

Today, thousands are receiving these Responder care benefits:

- **Annual monitoring exams**
- **Physical and mental health treatment for certified WTC-related health conditions like airway and digestive disorders, cancer, sleep apnea, and PTSD.**
